Project Name	Internal Job Mobility Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

The Customer Problem Statement below captures the perspective of employees who struggle to discover suitable internal job opportunities, understand their skill gaps, and plan their career growth within the organization. These problem statements guide the design of the Internal Job Mobility Assistant, ensuring the solution addresses real employee needs through AI-based job matching, resume analysis, and career path recommendations.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An employee with 3+ years of experience in my current role	Find internal job openings that match my skills and interests	I can't easily discover relevant opportunities across departments	Internal job postings are scattered and not matched to my profile	Frustrated and stuck in my current role
PS-2	A mid-level employee looking to switch domains internally	Understand what skills I'm missing for roles I want to move into	I don't have clear visibility into my skill gaps	There's no personalized tool to analyze my resume against target roles	Uncertain about how to plan my transition
PS-3	An employee aiming for long-term career growth within the company	Plan a clear career path with actionable next steps	I lack guidance on what growth path suits my background	Career planning is generic and not tailored to individual profiles	Anxious about my long-term career progression
