

PROJECT INITIALIZATION AND PLANNING PHASE

Date	03 July 2026
Team ID	XXXXXX
Project Name	Internal Job Mobility Assistant
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) Report

The proposed solution aims to transform internal talent mobility within organizations using Artificial Intelligence, improving employee career growth and HR decision-making. The system addresses challenges such as inefficient internal recruitment processes, lack of personalized career guidance, and poor visibility into employee skills. By leveraging Generative AI and intelligent analytics, the platform enables employees to discover suitable internal opportunities while helping HR teams make data-driven talent decisions. Key features include an AI-powered job matching engine, career path recommendations, and resume analysis for skill assessment.

Project Overview

Category	Description
Objective	The primary objective is to enhance internal job mobility by implementing AI-driven recommendations that enable employees to identify suitable internal opportunities and support HR in talent management.
Scope	The project focuses on internal recruitment and career development by integrating AI-based job matching, resume analysis, and personalized career path generation within an organization.

Problem Statement

Category	Description
Description	Employees often struggle to identify suitable internal opportunities due to limited visibility of available roles and lack of personalized career guidance. HR teams face challenges in efficiently matching talent with organizational requirements.
Impact	These issues result in reduced employee engagement, inefficient talent utilization, increased external hiring costs, and slower career progression within organizations.

Proposed Solution

Category	Description
Approach	Utilize Artificial Intelligence and Generative AI to analyze employee skills, match

Category	Description
	them with internal job opportunities, identify skill gaps, and recommend personalized career paths.
Key Features	• AI-Powered Job Matching Engine with compatibility scoring. • Personalized Career Path Generator with growth recommendations. • Resume Analyzer for extracting employee skills and experience. • Skill Gap Analysis and recommendations. • HR Dashboard for monitoring internal mobility trends. • Secure role-based authentication for Employees and HR Partners.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Intel i5/i7 Processor, Multi-core CPU
Memory	RAM specifications	8 GB RAM
Storage	Disk space for application and database	256 GB SSD
Software		
Frameworks	Backend and frontend frameworks	FastAPI, React.js
Libraries	Additional libraries	Google Gemini API, SQLAlchemy, Tailwind CSS, JWT, Pydantic
Development Environment	IDE	Visual Studio Code, PyCharm
Data		
Data	Source, size, format	Employee profiles, job descriptions, resumes (PDF/Text), SQLite Database
