

AI Prompt Logs

Date	03 July 2026
Team ID	XXXXXX
Project Name	Internal Job Mobility Assistant
Maximum Marks	3 Marks

AI Prompt Logs:

The development of the Internal Job Mobility Assistant extensively utilized Large Language Models (LLMs) such as ChatGPT and Google Gemini to accelerate various stages of the software development lifecycle. AI assistance was leveraged for designing system architecture, generating backend and frontend code, implementing AI-based functionalities, creating authentication mechanisms, and preparing technical documentation. Maintaining these prompt logs ensures reproducibility, tracks prompt engineering iterations, and demonstrates how AI tools enhanced development efficiency, code quality, and overall project productivity.

S.No	Task / Intent	System Prompt & Context	Exact User Prompt	AI Output Summary	Refinements / Iterations
1	Generate Project Architecture	Act as a senior software architect for an AI-based HR platform.	"Design a scalable architecture for an Internal Job Mobility Assistant using React, FastAPI, Gemini API, and SQLite."	Generated multi-layer architecture including frontend, backend, AI services, and database layers.	Refined architecture to include JWT authentication and HR dashboard.
2	Develop AI Job Matching Logic	Act as an AI engineer specializing in recommendation systems.	"Create Python logic to calculate job compatibility scores based on employee skills and job requirements."	Generated Python functions for compatibility score calculation and skill gap analysis.	Improved scoring mechanism and added weighted skill matching.
3	Generate Resume Analyzer Module	Act as a backend developer using FastAPI and Gemini API.	"Write FastAPI code to analyze employee resumes using Google Gemini API and"	Generated API endpoints and Gemini integration code for resume analysis.	Added exception handling and response validation.

S.No	Task / Intent	System Prompt & Context	Exact User Prompt	AI Output Summary	Refinements / Iterations
			extract skills, experience, and education."		
4	Create Career Path Generator	Act as an AI career advisor.	"Generate personalized career path recommendations based on employee skills and career goals."	Produced AI-driven career path recommendations and growth suggestions.	Refined prompts to generate three distinct career paths.
5	Design Frontend Components	Act as a senior React developer.	"Create React components with Tailwind CSS for Employee Dashboard and HR Dashboard."	Generated responsive UI components for dashboards and profile management.	Modified UI for better responsiveness and user experience.
6	Implement Authentication	Act as a FastAPI security expert.	"Implement JWT-based authentication and role-based access control for Employee and HR users."	Generated secure login, registration, and authorization code.	Added token validation and session persistence.
7	Generate Documentation	Act as a technical documentation expert.	"Prepare project documentation including problem statement, architecture, and sprint backlog for the Internal Job Mobility Assistant."	Generated structured documentation templates and project reports.	Refined content to align with SmartBridge documentation format.
